1/ Technical feature

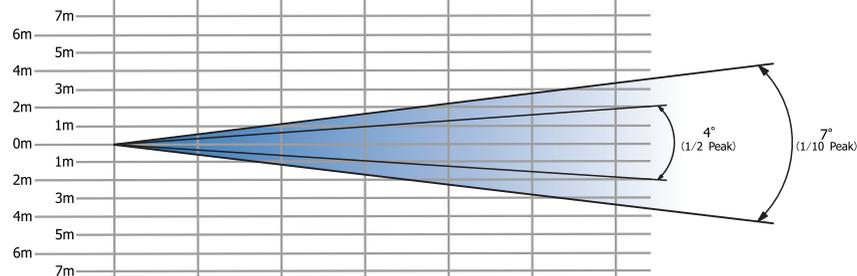

Technical feature	FINE 4019 /4019H PIXIE PLUS LED
Light source	40W 4 in1 LEDS
Input voltage	100-240V~ 50/60Hz
Input current	9A
Input power	900W
Power factor	PF \geq 0. 98
Beam angle	4°~60°
Initial luminous flux	Small angle: 5834.8 lm, Large angel: 12791 lm
Efficiency	Small angel: 6.9 lm/W, Large angel:15.14 lm/W
Color system	RGBW 4 in 1
Effect	All-optical domain dimming, 65536 grade dimming accuracy fast strobe 1-25Hz, preset 65 color macro functions, preset 64 effect macro functions
Pan	Pan= 2.11°/step, Pan fine=0.008°
Tilt	Tilt =270°, Tilt=0.94°/step, Tilt fine=0.0037°
Safety protection	Over current, over voltage and overheating protection
Control mode	DMX512/Wireless DMX (optional)
Control channel	21/35/78/97
Work environment	0°C~40°C
Fixture dimension	400×378×500mm
Package dimension	841×515.5×735.5mm
Weight	Net weight: 20kg, Gross weight: 42kg
Package	2pcs/flight case
IP rate	IP20

Note: The light source is not recommended to be replaced by user. Ask qualified maintenance personnel to replace the light source if any damage or overheat deformation occurs.

	1:LEDBoard Version	Vx.xx	1:LEDboard version inquiry
	Exit		Return to the last menu
	Sensor Monitor	Pan	Normal
Tilt			
Zoom		Error	Corresponding sensor works abnormally
Prism rotation			
Exit			Return to the last menu
Reset All Systems		Execute	Reset the fixture to original settings
		Cancel	Do not reset the fixture to original settings
Exit			Quit menu and back to "main menu"

5/ The control panel

5.1 Control panel introduction

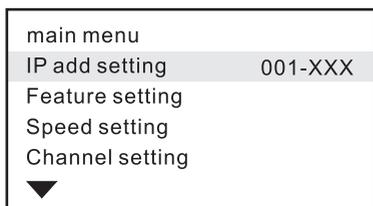

- 1.Exit button
- 2.LCD display
- 3.Function button(Enter)
- 4.DMX interface
- 5.Mains switch
- 6.Power in
- 7.Fuse

Figure(5.1-1)

5.2 Control panel Operation introduction

1. Mains switch: It's power off when turning the mains switch to "O". And it's power on when turning the mains switch to "I".
2. Press ● button to trigger the built-in battery(note:optional) for startup fixture and enter the main menu interface for menu operation.

Main Menu Interface

Note: Indicate the selected menu items in the menu interface. If you are sure to enter this menu, please press the runner to confirm. That is to say, enter the next menu and continue editing. If this menu option is not set in the entry address, the menu can be paged by rotating the runner.

Fig.5.2-1

3. Jog wheel:

Press down the jog wheel: enter an item/save the present value. Holds for a few more second, it will return to upper menu.

Clockwise rotate: scroll down the page/increase the parameter value.

Counter clockwise rotate: scroll up the page/decrease the parameter value.

Display inverse function: with connection to the supply, press down the "Exit button" and "Jog Wheel" almost at the same time, the screen display will invert by 180°.

Press the jog wheel for 2s: return to previous menu.

Long Press the jog wheel: return to the main menu.

If there no operation in 2minutes in the menu, which means to return to the original menu.

4. LED signal indication

DMX512 signal input: The LED light is on and the dot appears on the right side of the address code.

6/ Routine maintenance

This fixture requires routine cleaning. The service life depends on the operating environment heavily. Please kindly contact GUANGZHOU CHAIYI LIGHT CO., LTD for more maintenance information not included in this user's manual.

Notice: Excessive dust, smoke fluid and particulate buildup will degrade performance and cause over heating or damage to the fixture that is not covered by the warranty.

Warning: Please unplug the fixture before you open any covers.

Cleaning

Optical components should be cleaned carefully and lightly. Coating face is easily damaged, do not use harmful solvent so as to avoid damage to plastic parts or coating parts.

Cleaning optical components

1. Switch off the fixture and keep it cool completely, then open the cover.
2. Clean the floats by dust collector or compressed.
3. Use cotton paper without smell or cotton cloth soaked with the water, distilled water to wipe the granular thing, don't wipe the surface, float things should be blown away by the pressure gas.
4. Use the cotton cloth or cotton paper without smell soaked with isopropyl alcohol to remove the smoke and other residues. A commercial glass cleaner may be used, but residues must be removed with distilled water. Clean with a slow circular motion from center to edge. Dry with a clean, soft and lint-free cloth or compressed air.

Cleaning fan and air vents

Remove dust from the fans and air vents with a soft brush, cotton paper, vacuum, or compressed air.

7/ Safety information

The following symbols are used to identify important safety information on the product and in this manual:

DANGER!
Safety hazard.
Risk of severe injury or death.

DANGER!
Refer to manual before installing, powering or servicing.

DANGER!
Hazardous voltage. Risk of severe or lethal electric shock.

Warning!
Fire hazard.

Warning!
Burn hazard. Hot surface. Do not touch.

Warning!
Risk of eye injury. Safety glasses must be worn.

Warning!
Do not stare at the bulb which is still on.

Warning!
Risk of hand injury. Safety gloves must be worn.

Replace any cracked protective shield.

Minimum distance from lighted objects is 0.5m.

For indoor use only.

Do not direct lens to sun ray or strong light!

Do not actuate during operating.

Luminaires not suitable for direct mounting on normally flammable surfaces (suitable only for mounting on non-combustible surfaces)

$t_c \dots \text{°C}$

The surface's temperature is 62°C.

$t_a \dots \text{C}$

Rated maximum ambient temperature is 40°C.

Protection against explosion

Protection screen must be replaced if they have become visible damaged to such an extent that their effectiveness is impaired.

Protection against burning or fire

Keep flammable materials far away from the fixture. Minimum distance from the flammable materials is 0.5m.

8/ Product Connection

8.1 Included items

FINE 4019 PIXIE PLUS LED is packed with flight case. One single standard flight case carries two fixtures, Included items listed below (shown as table 8.1-1):

Accessories	QTY	UNIT
User manual	1	PCS
Warranty card	1	PCS
Female plug	1	PCS
Signal cable	1	PCS
Safety wire	1	PCS
Fuse	2	PCS

Table(8.1-1)

8.2 Power Connection

Power supply and fuses' type and rating:

Power	Fuse
100-240V~	10A 6X30

Table(8.2-1)

Notice: Type Y attachment for power supply connection. Method of attachment of the cable or cord such that any replacement can only be made by the manufacturer, his service agent or similarly qualified person.

The person must have the relevant qualification to connect the power supply. The AC power voltage shall be suitable to the lamp provided with over-loading or creepage protection.

1. Connecting the equipment to the power supply, do not connect to silicon box system, or else, it will destroy the equipment.
The fixture is provided with standard 3-pin socket. Please according to table 8.2-2 connect to power supply, Yellow/green line must be earthed. If you still have any question to the installation, please consultant with the experienced electrician.
2. When power is supplied, put the base switch to the position "I".

Color	Wire	Mark
Brown	Live	L
Blue	Neutral	N
Yellow/Green	Earth	

Table(8.2-2)

8.3 Signal Connection

Data linkage for the fixture may be provided by DMX512 connection and wireless linkage.

DMX connection

Note: The signal cable was type X connection.

Type X connection—if the external flexible cable or cord of this fixture is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or his service agent.

3-pin or 5pin XLR connectors are provided for fixture DMX input and output. Pin 1 is for earthing, pin 2 is for minus signals, and pin 3 is for plus signals. To prevent and absorb the reflection and interference of the signals, each data link must be ended by a respective terminator.

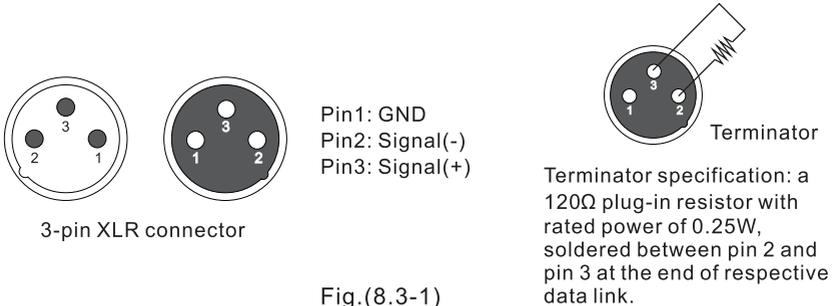

Fig.(8.3-1)

Connect the fixtures with Max.5 pieces. Make sure to insert the “signal in” terminal in the last connecting fixture. shown in Figure8.3-2.

Note: Make sure the fixture vertically upwards when it is placed horizontally, the safe distance between two adjacent fixtures must be $\geq 500\text{mm}$.

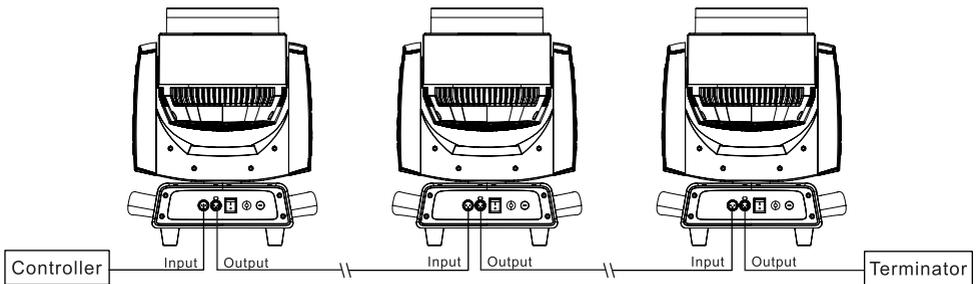

Fig.(8. 3-2)

If long-distance data transfer occurs, a DMX512 signal amplifier is necessary. The added amplifier is inserted between the lighting controller and the first fixture on the basis of a normal data link.

Notice!

1. No more than one signal input or output can occur in one fixture.
2. Don't split a data link via output ports on the fixture, use a DMX512 signal amplifier instead, if necessary.
3. Use only shielded-pair cables, and standard microphone cable is not reliable for long-distance data transfer.
